MACY BELLA GANZ

IN MARCH 2008, MACY WAS DIAGNOSED WITH STAGE 4 CLEAR CELL SARCOMA OF THE KIDNEY. MACY COMPLETED 30 WEEKS OF AGGRESSIVE CHEMO AND 14 RADIATION THERAPY SESSIONS. AT THE END OF TREATMENT, THE CCSK HAD SPREAD TO HER BRAIN. MACY HAD THE SURGERY AND ADDITIONAL THERAPY SPENDING THE SUMMER OF 2009 CANCER-FREE. IN SEPTEMBER 2009, IT WAS DISCOVERED THAT MACY DEVELOPED AML (LEUKEMIA), REQUIRING ADDITIONAL CHEMO AND A STEM CELL TRANSPLANT. MACY HAD HER STEM CELL TRANSPLANT ON JANUARY 14, 2010. MACY HAD A PERFECT 10 OUT OF 10 MATCH! EVERYTHING WENT WELL AS FAR AS TRANSPLANT GOES. TWO DAYS AFTER THE TRANSPLANT, MACY WAS UNABLE TO WALK A TUMOR WAS DISCOVERED GOING THROUGH HER SPINAL CANAL AND INTO THE SACRAL AREA. IT WAS CONFIRMED HER CCSK WAS MISSED ON PREVIOUS SCANS IN SEPTEMBER, NOVEMBER AND DECEMBER.

**AT THIS TIME MACY IS STILL UNDERGOING TREATMENT
TO BECOME CANCER FREE AGAIN.**
